

Rory Burton Hughes

Saint John, NB | 506-271-7876 | hughesrory8@gmail.com | rory-hughes.github.io/

Overview

- Currently enrolled in Information Technology: Software Development at New Brunswick Community College; expected graduation 2027; cumulative GPA: 3.91.
- Hands-on experience creating unit, integration, UI, and regression coverage for Android and Windows applications.
- Prior exposure to Selenium and Playwright through small browser-automation experiments, including form-filling workflows.
- Careful written communicator who documents blockers, verification gates, expected behaviour, and user-facing quality concerns.

Notable Skills

- **Quality Assurance:** Test-case design, manual workflow checks, defect reproduction, fix verification, and release-readiness checklists.
 - Automated testing across unit, integration, Android UI, view-model, UI-structure, and regression layers.
 - Browser automation familiarity with Selenium and Playwright; prepared to refresh and extend this experience.
- **Web and Data:** JavaScript, TypeScript, SQL, HTML5, CSS3, browser-based user flows, forms, and data validation.
- **Development:** C#, Kotlin, Git, GitHub, Bash/command line, WPF, Jetpack Compose, Room, Hilt, and Firebase.
- **Communication:** Requirements analysis, technical documentation, stakeholder feedback, customer service, and teamwork.

Projects and Other Related Activities

MileageTracker

github.com/Rory-Hughes/MileageTracker

Android and Kotlin

Public GitHub project

- Built automated unit and Android UI coverage for validation, interrupted-trip recovery, synchronization, authentication, exports, and core screens.
- Maintained a closed-beta checklist separating implemented features, known blockers, device smoke tests, emulator-rule checks, and release gates.

John Howard Program Management and Data Collection System

John Howard Society of Saint John

Windows WPF

In development

- Converted stakeholder discussions, feedback, mockups, and requirements into testable workflows for a privacy-minded nonprofit system.
- Built C# unit, integration, view-model, UI-structure, and regression tests across application layers; maintained manual test evidence using synthetic data.

Education and Training

Information Technology: Software Development

New Brunswick Community College

Expected graduation 2027

Work Experience

Customer Service Representative

Home Hardware

Quispamsis, NB

- Supported customers and completed data-entry and inventory tasks where accuracy and clear communication were essential.

Mover

Mackies Moving

Saint John, NB

- Followed detailed logistics, identified issues, and coordinated safely with teammates to meet service deadlines.

Volunteer, Boys and Girls Club

Saint John, NB | October 2025

- Troubleshoot Raspberry Pi boards used for motion-triggered effects during a fundraiser installation.
